WENMOON
Social-Fi Market

Redacted

Ask

WENMOON is a revolutionary SocialFi platform built on Solana that combines social networking with decentralized finance. Our platform enables creators to monetize their content through creator tokens, engage with their community, and participate in a vibrant ecosystem of social trading and content creation.

Creator Tokens

- Personal Brand Monetization: Every creator can launch their own token
- Community Ownership: Fans can invest in their favorite creators
- Revenue Sharing: Creators earn from trading fees and community engagement
- Vanity Addresses: Custom token addresses ending in "wen" for brand recognition

Social Features

- Content Creation: Share posts, memes, and updates with your community
- Real-time Feed: Stay updated with posts from creators you follow
- Engagement Tools: Like, comment, and interact with content
- Profile Customization: Complete profiles with bio, images, and social links

Trading & Finance

- Jupiter Integration: Seamless token trading with best prices
- Real-time Market Data: Live market caps and price updates
- Trading Notifications: Get notified of significant trades
- Portfolio Tracking: Monitor your creator token investments

Smart Notifications

- Real-time Updates: Instant notifications for comments, follows, and trades
- Automatic Read Status: Notifications marked as read when viewed
- Cross-platform Sync: Consistent notification state across devices
- Smart Filtering: Filter by notification type (comments, follows, trades)
