

* Protocol Fees

[Ask](#)

WenMoon is designed with a fair and sustainable economic model that aligns incentives for both creators and the platform.

Fee Structure:

- **2% Trading Fee:** All trades incur a 2% fee, collected in SOL to keep everything native to the Solana ecosystem.
- **Meteora Share:** 20% of total fees go to Meteora for powering the underlying infrastructure.
- **Remaining 80% Split:**
 - **60% to WenMoon Protocol:** Supports ongoing development, platform maintenance, and long-term growth.
 - **40% to Token Creators:** Rewards creators for launching and nurturing community-led projects.

Liquidity and Security:

- **100% Locked Liquidity:** All liquidity for tokens launched on WenMoon is 100% locked. This is a crucial security feature that prevents "rug pulls" and provides immense confidence to investors and traders. It demonstrates a long-term commitment to the project's stability and success.
- **Fees in SOL Only:** All trading fees are collected in SOL, the native cryptocurrency of the Solana blockchain, simplifying transactions and aligning with the Solana ecosystem's standards.
