

Rewards

Ask

At WenMoon, we believe in rewarding creators directly and transparently. We've made it incredibly easy to track your earnings and claim your hard-earned SOL.

Your Portfolio Tab: Your Central Hub

Navigate to the "Portfolio" tab within the WenMoon platform (accessible through the Chrome Extension or our website at wenmoon.gg ↗) to get a complete overview of your creations.

Here, you'll find:

- **All Your Created Tokens:** A comprehensive list of every token you've successfully launched using WenMoon. Stay organized and keep track of your growing portfolio.
- **Launched Token Details:** For each token, you can view key information such as its current status, trading volume (via integrated links to platforms like Jupiter), and accrued fees.

Effortless Fee Claiming: Always in SOL!

The best part? Claiming your share of the trading fees is straightforward and hassle-free:

- Unclaimed Fees at a Glance: The "Portfolio" tab clearly displays the amount of unclaimed trading fees for each of your tokens.
- One-Click Claim: With a simple click, you can claim your accumulated fees directly to your connected Solana wallet.
- Always in SOL: All creator payouts are always in SOL, the native currency of the Solana blockchain. This ensures seamless integration within the Solana ecosystem and eliminates the need for conversions or dealing with other tokens.
